ABSTRACT

This directory presents 1989 information on a census of educational research and development and service improvement organizations in the Mid-Atlantic region (Delaware, the District of Columbia, Maryland, New Jersey, and Pennsylvania). The introduction describes survey methodology and provides an overview of the research and development organizations in the region in terms of the type of organization, services, expertise, and clients. An explanation of how to use the directory and sections presenting brief descriptions and directory information on state departments of education, intermediate service agencies, and ERIC clearinghouses serving the area follow. Listings of the 94 regional educational resource organizations comprise the main section of the directory. A resume is provided for each organization which contains the following information: name, address, telephone number, and contact person; year founded; type of agency; services offered; areas of expertise; client groups; costs for services; staff size; and a brief description of the agency, its focus and workscope, activities, and services. Agencies are indexed by primary services and primary areas of expertise. A copy of the survey instrument is appended. (MES)

I. INTRODUCTION

This directory presents 1989 information on the census of educational R&D and service improvement organizations in the Mid-Atlantic region conducted by Research for Better Schools, Inc. (RBS), the educational laboratory serving Delaware, the District of Columbia, Maryland, New Jersey, and Pennsylvania. RBS has prepared analyses and presentations on the educational R&D capability of the Mid-Atlantic region since 1982. The remainder of this introduction provides an overview of the analysis of the R&D organizations in the region in terms of their organization type, services, expertise, and clients. The sections following describe how to use the directory and list individual organizations which may be contacted by education practitioners for assistance.

Purpose

Regional laboratories are designed to provide R&D services to the educational system in a way that will foster school and classroom improvement. In order to accomplish this aim effectively, a laboratory must understand the system and its needs. Laboratories are not the only agencies with R&D capabilities in the region, however. They don't operate in a vacuum. Thus, it is equally important for a laboratory to be knowledgeable about other organizations in its region which have R&D capabilities that can respond to the needs of the educational system. This knowledge is a factor in planning the laboratory program and coordinating the laboratory's efforts with other R&D resources in the region. It is in recognition of these opportunities that the laboratory contacts existing organizations which provide research, development, dissemination or technical assistance in the region. Data on

their activities are crucial to identifying gaps in services and possible partners for collaboration. In addition to this use within the laboratory, these data were seen as potentially useful to practitioners in need of R&D assistance. Accordingly, RBS publishes this directory in a format for practitioner use.

1989 Activities

The original data base for this directory is the result of surveys of approximately 1,400 organizations which were identified through a comprehensive search for R&D providers in the region. Although directories of the R&D organizations included in the data base were published in 1983, 1984, and 1985, the primary use of the data was for laboratory analysis of the region and program planning. Accordingly, the early directories included much statistical and analytic information.

Once the data base was firmly established, RBS decided to produce an annual directory for use by educators in the region as a reference to R&D resources. This purpose has been maintained since 1986, including this 1989 directory. This decision affected the sample of organizations to be included in the directory, the survey procedures to be utilized, and the format of the directory itself. Each of these topics is discussed in this section.

Sample

The 1988 data base became the starting point for the 1989 sample. This data base was composed of organizations which appeared in the 1988 directory and those newly formed organizations that had professional contacts with RBS during the past year. This sample included organization which provided R&D

services to other agencies concerned with various facets of elementary and secondary education. The sample included non-profit organizations, for-profit firms, and private consultants. Also included were major professional associations, organizations that provide information/publications, and organizations that serve private schools.

Procedures

During 1989, preparation of the directory was limited to updating information on organizations already included in the data base. In order to update information, RBS sent to the contact person of each organization the 1988 directory listing and asked him/her to correct any misinformation. The directory listing included the organization name, address, contact person, telephone number, year founded, agency type, size of professional staff, services, expertise, clients, costs for services, and a brief description of the organization.

The directory listings were sent to the sample of 154 organizations in February, 1989. Each contact person was instructed to return the listing by the end of March 1989; if no response was returned, RBS would assume the listing was correct. Responses were received from 77 organizations (50 percent).

RBS decided to apply more stringent criteria for determining which organizations qualified as R&D agencies in updating the directory this year. In past directories, RBS included many organizations that provided tailor-made consultant services or advocacy groups with little R&D capability. These organizations were excluded in the 1989 directory. As a result, a total of 94 organizations comprised the 1989 data base.

Directory Format

Annual directories prior to 1986 were organized primarily as data displays with organizations and characteristics presented in chart form, while later directories have been arranged by organization. This format was followed in the 1989 directory. Each responding organization included in the 1989 directory is described in a one-page abstract which contains descriptive information as specified above and a 100-200 word profile. The organizations are ordered alphabetically and indexed by primary services and areas of expertise. Introductory sections address how to use the directory and describe state departments of education, intermediate service agencies, and ERIC clearinghouses that serve the region. The 1989 directory is made available to educators in the region either through complimentary copies or the RBS Publications Office.

Results

Augmentation of the R&D resources data base to produce the 1989 directory confirmed the majority of the results reported in 1988. More specific information on the R&D organizations in the region is presented below.

Organization Type

Table 1 shows the distribution of organizations across the various possible types.

Table 1

Number and Percent of Regional R&D Organizations by Type

Type	Number	Percent
Post-Secondary Education Institution R&D Centers	26	12.8
R&D Agencies (Profit and Non-Profit)	18	19.1
National Professional Associations	15	16.0
Post-secondary Education Institutions	9	9.6
State Professional Associations	8	8.5
Social Service Agency	2	2.1
Other	16	25.0
Total	94	100.0

R&D centers located at post-secondary institutions were the most pre-dominant organization type. Independent R&D agencies, both for-profit and non-profit, accounted for the second largest group. National professional associations also ranked high. State professional associations, social service agencies, and a mixture of other organizations filled out the list. Organizations in the "other" category include museums, training institutions, and curriculum and information resource centers.

R&D Services and Areas of Expertise

Analyses were conducted of the services provided by regional R&D organizations and the results are displayed in Table 2. Presentations/conferences/workshops were the most frequently cited services, listed by almost three-quarters of the respondents. Publications/dissemination accounted for over 60 percent of the organizations while staff development, development, and research were listed by at least 40 percent each. Program assessment/evaluation and technical assistance each accounted for

approximately one-third of the organizations. These types of services also ranked high in the 1988 directory.

Table 2

Primary Services of Regional R&D Organizations

Service	Number of Respondents	Percent of Respondents
Presentations/Conferences/Workshops	68	72.3
Publications/Dissemination	59	62.3
Staff Development	43	45.7
Development	42	44.7
Research	38	40.4
Program Assessment/Evaluation	32	34.0
Technical Assistance	30	31.9
Needs Assessment	18	19.1
Planning	15	16.0
Program Implementation	13	13.8
Management	6	6.4
Other	10	10.6

Note: N=94.

Table 3 on the following page presents the areas of expertise cited by the responding organizations. The six most frequently cited areas of expertise were:

- school effectiveness/improvement (27.7 percent)
- staff development (27.7 percent)
- at-risk students (25.5 percent)
- school administration/management (25.5 percent)
- evaluation/assessment (24.5 percent)
- educational technology (23.4 percent).

All of the other areas of expertise were identified by less than one-fifth of the responding organizations. The top four areas were the same for 1988 and 1989.

Table 3
Primary Expertise of Regional R&D Organizations

Expertise	Number of Respondents	Percent of Respondents
School Effectiveness/Improvement	26	27.7
Staff Development	26	27.7
At-Risk Students	24	25.5
School Administration/Management	24	25.5
Evaluation/Assessment	23	24.5
Educational Technology	22	23.4
Instructional Effectiveness	20	21.2
School-Community Relations	16	17.0
Adult Education	15	16.0
Early Childhood	14	14.9
Reading/Language Arts	14	14.9
Career/Vocational Education	11	11.7
Basic Skills Performance	10	10.6
Higher Order Thinking Skills	10	10.6
Student Testing/Academic Performance	10	10.6
School Finance	9	9.6
School Climate	8	8.5
Science	7	7.4
School-Business Relations	7	7.4
Social Studies	6	6.4
Teacher Supervision/Evaluation	6	6.4
Mathematics	3	3.2
Other	15	16.0

Note: N=94.

R&D Clients

Respondents were asked to list their organizations' primary clients (maximum of three). Their responses are summarized in Table 4.

Table 4

Clients Identified by Regional R&D Organizations

Client	Number of Respondents	Percent of Respondents
Local Education Agencies (schools, school districts, and personnel)	36	91.5
State Education Agencies	35	37.2
Private/Parochial Schools	30	31.9
Post-Secondary Education Institutions	27	28.7
Intermediate Service Agencies	25	26.6
Business and Industry	19	20.2
Professional Associations	16	17.0
Other	16	17.0

Note: N=94.

Over 90 percent of the 1989 organizations indicated service to public schools as a primary activity. State education agencies and private/parochial schools were listed as clients by approximately one-third of the respondents. Other frequently cited clients were post-secondary education institutions and intermediate service agencies. Other types of clients (e.g., professional associations, business and industry) were served in much fewer numbers. These results are consistent with the 1988 directory findings.

R&D Organization Size

R&D organizations were asked to indicate the number of full-time and part-time staff they employed. Table 5 presents these data.

Table 5

Size of Regional R&D Organizations' Professional Staff

Number of Employees	Full-Time		Part-Time	
	Number	Percent	Number	Percent
Unknown	2	2.1	2	2.1
0	10	10.6	34	36.2
Less than 10	37	39.4	39	41.5
10 to 20	17	18.1	9	9.6
More than 20	28	29.8	10	10.6

Note: N=94.

Half of the organizations had fewer than 10 professionals on the staff full-time. Approximately 13 percent employed 10 to 20 professionals full-time, and another 30 percent employed more than 20 professionals full-time. Most of the responding R&D organizations relied very little on part-time professional staff. Almost 80 percent had less than 10 part-time professionals on staff. Clearly, the vast majority of regional R&D organizations are relatively small agencies with limited resources available to clients. These data are consistent with the 1988 directory.

Costs of R&D Services

Table 6 summarizes the costs of services reported by responding organizations.

Table 6

Cost of Services of Regional R&D Organizations

Costs	Number of Respondents	Percent of Respondents
Variable Costs	34	36.2
Fees Based on Cost Recovery	26	27.7
Set Fees	22	23.4
Membership Dues	19	20.2
Free to Eligible Clients	18	19.1
Free to All Clients	9	9.6

Note: N=94.

Costs for services varied depending on the service for over a third of the responding organizations. Approximately one-fourth based their fees on cost recovery or established set fees. One-fifth provided services free to eligible clients while less than 10 percent provided services free to all clients. One-fifth relied on membership dues. A large proportion relied on multiple cost formulas. These data are consistent with information provided in the 1988 directory.

Summary

In summary, the general profile of R&D resources in the region presented in earlier reports again was confirmed by FY 89 work. R&D centers, either based at institutions of higher education or independently operated,

were the primary providers of service with local education agencies being the primary clients. Private and parochial schools and state education agencies also appeared frequently as clients. The most frequent services were presentations/conferences/workshops, publications/dissemination, staff development, and development. The most frequent primary areas of expertise were school effectiveness/improvement, staff development, at-risk students, school administration/management, evaluation/assessment, and educational technology. The majority of the organizations have fewer than 10 full-time or 10 part-time professional staff. Most organizations used multiple fee schedules to charge for services.

II. HOW TO USE THIS DIRECTORY

The main body of this directory is comprised of those public and private organizations identified in the 1989 survey. In addition to those organizations responding to the survey, also included are the names, addresses, and telephone numbers of public information officers at each of the state departments of education in the Mid-Atlantic region, a list of intermediate service agencies and contact persons in New Jersey and Pennsylvania, and the Educational Resources and Information Center (ERIC) Clearinghouses located throughout the nation.

The heart of the directory remains, however, the regional educational resource organizations. These are listed in alphabetical order, without regard to geographic location. A resume is provided for each organization consisting of the following information: name, address, telephone number, and contact person; year founded; type of agency; services offered; areas of expertise; client groups; information about costs for services; staff size; and a brief written description of the agency, its focus and work-scope, activities, and services.

The directory is searchable in a number of ways. An alphabetical index of organizations appears on pages 23-26 and may be used to quickly locate an agency already known by name. Organizations also have been indexed by the primary services they offer and their primary areas of expertise. For example, under Program Assessment/Evaluation in the Primary Service Index there is a list of page numbers on which organizations offering such services can be located. Complete listings of primary services and primary areas of expertise are located on pages 121 and 122 respectively.

III. STATE DEPARTMENTS OF EDUCATION

There is tremendous variety among the state departments of education in the Mid-Atlantic region in their organization, the types of services provided, and their relationships to local school districts. Collecting uniform and complete information for each state is not possible. The directory instead has identified contact person for each department -- the first stop for a practitioner seeking information from or about state departments of education.

IV. INTERMEDIATE SERVICE AGENCIES

Intermediate service agencies often provide R&D services to local school districts. In New Jersey and Pennsylvania, these agencies represent important R&D providers and so they are listed by state below. Delaware, District of Columbia, and Maryland do not have such agencies.

New Jersey

Learning Resource Centers. Sponsored by the New Jersey State Department of Education, Division of Special Education, the Learning Resource Centers (LRCs) offer a range of information services, materials, training, technical assistance, and consultation services to educators and parents of special education students in the state.

Regional Curriculum Services Units. The Regional Curriculum Service Units (RCSUs) function as the intermediate level support/field agencies of the New Jersey State Department of Education. Each unit serves a seven-county region, focusing primarily on major curriculum initiatives. Services provided include training, consultation, networking, brokering, and pilot projects. Training activities are primarily offered on multiple district bases. Consultation services are provided to those who wish to implement training on a building/district-wide level. Consultation services may also be accessed through the offices of the County Superintendent of Schools. Topic areas currently addressed include the major subject disciplines, computers, planning, evaluation, curriculum development/alignment processes, disruptive youth, special education, drug and alcohol abuse, and nutrition education.

Intermediate Units. Intermediate units in Pennsylvania are part of the governance structure of public education in the Commonwealth. They operate at a level between the state education agency and the local school districts, and primarily provide services to local school districts that can be operated more effectively and efficiently on a regular basis. Intermediate units also have been given the responsibility of providing programs/services to students attending the nonpublic schools in their regional area. The majority of the programs offered by intermediate units are supported by federal or state allocations, with some programs and services funded by local school district contributions.

Special Education Regional Resource Centers. The Pennsylvania Special Education Regional Resources Centers (SERRC) are funded by the Pennsylvania Department of Education, Bureau of Special Education, for the express purpose of providing information, instructional media and materials, training, and technical assistance to teachers, administrators, and others involved in the education of exceptional children. Services include loans of instructional materials, equipment, films and videos; dissemination of bibliographic information; computer laboratory services, and training programs and workshops. In addition to the above services, the Central SERRC maintains an Assistive Devices Center, and the Eastern SERRC maintains the Pennsylvania Resources and Information Center for Special Education (PRISE), which offers information to special educators and support personnel working with students with individualized education plans. PRISE information resources include computerized data bases covering program and curriculum topics, computers and software applications, legislation, instructional management and techniques, and an extensive collection of books, journals, indices, tests, and other documents.

V. EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC) CLEARINGHOUSES

Educational Resources Information Center (ERIC) is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, DC and 16 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system.

In addition to collecting the literature of education for announcement in Resources in Education and Current Index to Journals in Education, the ERIC clearinghouses analyze and synthesize the literature in a number of different formats designed to compress the vast amount of information available and to meet the varying needs of ERIC users. These formats include research reviews, state-of-the-art studies, interpretive studies on topics of high current interest, research briefs, annotated bibliographies, and compilations. While some publications are comprehensive reviews designed for those who are interested in pursuing a subject in depth, others are brief analyses designed for the busy practitioner whose time for staying abreast of new developments in education is limited.

ERIC publications are published either by the ERIC clearinghouses responsible for producing them or through cooperative arrangements with other organizations. Copies are usually available directly from the responsible clearinghouse or from the source listed in the citation. The 16 clearinghouses are listed below by education areas they address.

The American Association of Physics Teachers (AAPT) is an organization of over 10,000 university, college, two-year college, and high school teachers, students and friends. Founded in 1930, AAPT is dedicated to advancing the teaching of physics and furthering the role of physics in our culture. Membership in AAPT brings many benefits, including periodicals, group insurance, regional meetings, and educational information. Two national meetings per year provide the opportunity for members to contribute papers, hear invited speakers, and share ideas. AAPT currently recognizes many outstanding physicists through its various awards program. AAPT also maintains an extensive collection of products designed to aid physics teachers and students.

The American Association of School Administrators (AASA) is a professional organization for 18,500 educational leaders. Major activities of the association include national academies and executive development centers for executives, publications designed to increase the knowledge and skills of educational leaders, governmental relations, conferences and minority affairs. Special groups within the organization work to assist administrators in small, rural, suburban, urban and regional school districts. The annual convention provides educational leaders job-related knowledge and skills. The annual legislative conference, held in coordination with the American Association of Educational Service Agencies, brings legislators and administrators together to increase that two-way communication and their effectiveness.

The society is a non-profit scientific and educational association of professional chemists and chemical engineers. The society is dedicated to the advancement of chemistry in all its branches, the improvement of chemists' qualifications, and the promotion of scientific interests and inquiry. Annual meetings are held at the local, regional, national and divisional levels and numerous journals, magazines and books are published by ACS. The educational activities of the society include career services, continuing education, evaluation and approval of college chemistry departments, undergraduate affiliate services, high school chemistry programs, and pre-high school science programs.

Since its inception in 1977, the American Council for Drug Education, Inc. (ACDE) has been educating the American public about the health hazards associated with the use of marijuana and other psychoactive substances. ACDE believes that an informed public is our nation's best defense against drug abuse. To that end, ACDE develops media campaigns, prepares and publishes educational materials, promotes research, organizes conferences and seminars, reviews scientific findings, and produces films.

The American Educational Research Association (AERA) is concerned with the improvement of the educational process through the encouragement of scholarly inquiry related to education, the dissemination of research results, and their practical application. AERA represents approximately 14,000 educators; administrators; directors of research, testing, or evaluation in federal, state, and local agencies; counselors; evaluators; graduate students; and behavioral scientists actively concerned with educational research and its application. AERA annually sponsors several programs/meetings designed for the specific interests of the educator and researcher in a broad range of disciplines. AERA regularly publishes five journals; other publications and monographs are periodically available.

American Institutes for Research (AIR) provides research, training, and technical assistance to federal, state and local educational programs that affect basic skills, gifted and talented students, career education/vocational education, and adult education. AIR develops and disseminates instructional materials and competency-based tests, and conducts evaluative studies. AIR also has developed curricula in social skills, evaluated electronic instructional aids, improved vocational education and work opportunities for the handicapped, and is applying microcomputer technology to the education of the learning disabled. AIR has worked to develop and promote strategies to improve equity and consumer protection at all levels of education, and has worked to eliminate sex stereotyping in career choices. AIR also has broad experience in creating, verifying, maintaining, and extracting data from large-scale, online data bases.

The American Political Science Association is the major professional organization in the United States whose members are engaged in the study of politics. Founded in 1903, the association provides members with services to facilitate research, teaching, and professional development. In addition to membership privileges and services, the association offers a series of SETUPS (supplementary empirical teaching units in political science) that introduce students to political analysis using the computer, a series of instructional units on women and American politics, and other instructional resources. The association also produces quarterly publications and sponsors professional development and fellowship opportunities.

ASPIRA's primary mission is to foster the socioeconomic development of the Latino community. ASPIRA has identified three national goals designed to prepare Hispanic youth to accept their responsibilities as adult leaders in their community. As part of this mission, ASPIRA attempts to increase the access of Hispanic youth to quality education and leadership training through research, pilot programs, and related advocacy projects. In addition, ASPIRA develops the leadership, motivation, and growth of Hispanic youth through counseling, educational, and vocational programs.

The Association for Children and Adults with Learning Disabilities (ACLD) is devoted to defining and finding solutions for a broad spectrum of learning problems. ACLD's major goals are to: encourage research in neuro-psychological and physiological aspects of learning disabilities; stimulate development of early detection programs; create a climate of public awareness and acceptance; disseminate information widely; serve as an advocate; develop and promote legislative assistance; improve regular and special education; and establish career opportunities. ACLD's national headquarters has a resource center of over 500 publications for sale in addition to providing a film rental service. ACLD and its state affiliates also work directly with school systems in planning and implementing programs for early diagnosis as well as remediation in resource and special classroom situations. Because of the relationship of learning disabilities to school drop-out and delinquency, the Adolescent and Young Adult Committee works with educators, correctional authorities and jurists in order to develop comprehensive approaches to the education and employment of learning disabled young adults.

The largest professional leadership organization in education, Association for Supervision and Curriculum Development (ASCD) has more than 80,000 members. ASCD seeks to improve education by increasing leaders' knowledge and skills in the areas of curriculum development, supervision, and instruction. Members receive the professional journal, Educational Leadership, newsletters, a yearbook, and three to five books each year on relevant topics. Members also may purchase ASCD videotapes, other media and professional journals. ASCD sponsors an annual conference and two programs for professional development, the National Curriculum Study Institute and the National Training Center. In addition, ASCD publishes reports of special project groups and conducts a variety of research and information services.

Bloomsburg University is committed to the preparation of beginning teachers of the highest quality. Programs are offered for preparation of teachers for early childhood centers and elementary schools, academic subjects in secondary schools, special education, communication disorders, and business education. In addition, the College of Professional Studies offers a variety of outreach services. For example, the Curriculum Materials Center locates, acquires, catalogs and makes accessible curricular and instructional materials to preservice and inservice teachers. Center resources include elementary and secondary textbooks, curriculum guides, games, instructional materials kits, tests and computer software. In addition, the college's Reading Unit and Speech, Hearing, and Language Clinic both offer diagnostic evaluation, counseling, instruction, and consultation.

The Children's Defense Fund (CDF) gathers data, publishes reports, and provides information on key issues affecting children, including health, education, child welfare, mental health, child development, adolescent pregnancy prevention, and youth employment. CDF monitors federal and state policies, and provides information, technical assistance, and support to a network of state and local child advocates, organizations, and public officials. CDF also educates thousands of citizens annually about children's needs and responsible policy options for meeting those needs.

The College of Education and Human Services of Clarion University of Pennsylvania provides a wide range of services to school districts, primarily in the areas of needs assessment and staff development. Programs and collaborative efforts typically are the result of college solicitations to local district personnel, though the college also is prepared to respond to direct requests from these districts. In areas of staff development, college faculty design and deliver inservice programs or credit courses that focus directly on district need and context. Areas of expertise indicated above reflect only current activities; the college is prepared to provide similar services in all other areas in which its faculty has expertise.

Information Technology Education for the Commonwealth (ITEC) is a recent program created to improve microcomputer education in Pennsylvania schools. There are two main components of ITEC -- teacher education and software/courseware grants for schools. ITEC offers schools at fourteen regional computer resource centers (RCRCs) the following assistance: teacher training in microcomputers, assistance in designing computer-oriented curricula, evaluation of proposals for upgrading computer instruction in schools, computer hardware loans to nonpublic schools, and software preview libraries.

Business/Industry

For over thirty years, the Council for Basic Education (CBE) has insisted that the first priority of American schools should be a sound education in the liberal arts, not just for a favored few, but for all children. The council comprises a nationwide association of educators, parents, corporations, foundations, policy-makers, and other citizens committed to strengthening the teaching and learning of the basic academic disciplines of English, foreign languages, history, mathematics, science and the arts. CBE works closely with school districts to devise new programs and to provide analysis of need and sound advice on how best to strengthen the teaching and learning of the a basic academic disciplines. Activities include CBE's Mathematics and Science Institutes, the Writing to Learn staff development program, Humanities Institutes, and Action for Better City Schools (Project ABCs).

The Council for Elementary Science International (CESI) is dedicated to providing services and professional leadership in elementary school science. The objectives and purposes of CESI are to stimulate, improve, and coordinate science teaching at all levels of the elementary school and to promote the improvement of integrated K-12 science programs. For both members and nonmembers, CESI makes available information resources, instructional materials and programs, and activities aimed at developing excellence in elementary science teaching. CESI produces source books containing classroom tested activities, monographs, occasional papers on specific educational topics and a quarterly newsletter.

The Council of Chief State School Officers (CCSSO) is a nationwide non-profit organization of the 57 public officials who head departments of elementary and secondary education in every state and extra-state jurisdiction. CCSSO seeks its members' consensus on major education issues and expresses their views to civic and professional organizations, federal agencies, Congress, and the public. Through its structure of standing and special committees, the council responds to a broad range of concerns about education issues. CCSSO appoints federal liaison representatives and operates the Office of Federal/State Relations, the Resource Center on Educational Equity, a State Education Assessment Center, the Office of International Education, the Study Commission, and the National Teacher of the Year program. CCSSO creates and coordinates seminars, educational travel, and study programs that offer many opportunities for the professional growth and development of chief state school officers and their management teams. In addition, CCSSO sponsors a wide range of publications on pertinent education issues.

The Council on Economic Education in Maryland was established in 1953 as a non-profit, non-partisan educational organization whose purpose is to improve the quality and increase the quantity of economic education delivered to Maryland's elementary and secondary school children. With its network of nine centers for economic education, it provides curriculum consultation, teacher training, and instructional materials for the state's public and nonpublic school systems, with funding provided by the state and the private sector. The staff also is available to work with preservice teacher education at the state's colleges and universities.

Delaware School Boards Association is a member of the family of state board associations which now exist in nearly every state of the union. The Delaware association was organized in 1946 and became a member of the national association in 1952. The association's purpose is to encourage and foster utility of thought and action of school boards and to further the educational interests of the state. A principal function of the association is the study of school needs along with the proposal and/or support of legislation to provide for them. Through the association, Delaware school boards are becoming more involved in planning legislation for the public schools.

The Center for School Services (CSS) of East Stroudsburg University (ESU) acts as a liaison to provide university services to regional educators in four areas of expertise -- needs assessment, affective education, inservice, and international education. CSS initiated a needs assessment program in 1974 through a federal grant. The program has been used with more than 100 school districts throughout the Commonwealth. CSS will cooperate in scheduling regional affective education programs by providing an instructor, films, materials, and relevant activities for school district professionals; the program is designed so that the educators can practice a process directly applicable in their classrooms. CSS also will cooperate with school districts and other agencies in providing other types of inservice programs; the center has developed expertise in planning and conducting these programs in a wide range of areas. The university belongs to national and international organizations in order to provide internationally-based educational experiences for its constituents, students and faculty.

EIRC was established in 1968 as the Educational Improvement Center South to provide a regional service center for southern New Jersey educators. In 1983, under new legislation, EIC South became known as the Educational Information and Resource Center (EIRC) and now serves the entire state of New Jersey. Center staff offer assistance in curriculum development and evaluation, program evaluation, administrative services, and public relations. Specific activities focus on educational technology, gifted and talented students, child abuse and substance abuse. EIRC also houses an extensive library of educational materials and disseminates relevant information on programs and services through several publications.

The Educational Testing Service (ETS) is a private, non-profit corporation devoted to measurement and research, primarily in the field of education. There are 70 separate testing programs conducted by ETS on behalf of a great variety of sponsoring agencies and organizations representing education, government, business, professions, and occupations. These programs are designed to assist their sponsors in making decisions related to school, college, and graduate admissions; educational achievement and placement; the awarding of academic credit; certification and licensing; the awarding of scholarships and other financial aid; proficiency in English and other languages; selection and promotion; and program assessment and evaluation.

The Test Collection, an extensive library of over 15,000 tests and other measurement devices, provides information on tests and related materials to those in research, advisory services, education, and related activities. The tests are acquired from a variety of United States test publishers and individual test authors. Some foreign tests also are acquired. Qualified persons, whether affiliated with Educational Testing Service or not, may have on-site access to the Test Collection materials. Persons also may direct specific questions to its staff by mail or telephone. A large number of publications are produced. The Test Collection Bibliographies contain approximately 200 annotated test directories in specific subject areas available from the test collection. The Major U.S. Publishers of Standardized Tests lists publisher addresses and phone numbers and is available from the test collection free of charge. The News on Tests provides quarterly information on tests and testing. The Test Collection Database is a publicly searchable database through BRS, a commercial vendor of databases. The Tests in Microfiche makes available many tests that are cited in the educational and psychological literature but not available commercially.

Developed in 1983, through U.S. Department of Education Title VII funds, the Bilingual Education Skills Training Center (BEST) serves as the base for all activities related to bilingual education in the school of education. The BEST Center serves as a resource to the school and the community at large by offering technical assistance in program development for meeting the needs of limited-English-proficient (LEP) populations; developing and offering training to all education personnel and parents to enhance the education of LEP students; and providing references and resources related to bilingual education. The major focus of the BEST Center is the development of language proficiency in content areas such as math and science. Training also is provided in such areas as cooperative learning, development of complex instruction, use of Finding Out/Descubrimiento, language experience approach, and language acquisition theory and practical application. Research related to effective teacher education models for meeting the needs of LEP populations also is conducted and gathered by the BEST Center.

The Center for Assessment and Demographic Studies (CADS) was established in 1968 to collect information about hearing impaired children and youth. Its mission ever since has been to provide information helpful for the improvement of educational opportunities for hearing impaired youth. The main project of the center is the Annual Survey of Hearing Impaired Children and Youth, the largest ongoing database in the world concerning hearing impaired, school-aged children. Early in its history, CADS became involved in analyzing and publishing data about the educational attainment of the students reported in its annual survey. CADS has become a distribution source for special test materials and analyses of test results that can help schools improve their instructional strategies for hearing impaired students. Also, CADS has recently conducted studies of classroom communication practices, postsecondary education opportunities for deaf students, and the assessment of deaf students' writing abilities. In the last two years, the work of the center has expanded to include older hearing impaired individuals and persons with other disabilities.

The Center for Economic Education at Gannon University was established to contribute to the development of economic literacy and understanding among the people of Erie and northwestern Pennsylvania. The center is part of a national network of over 200 centers of economic education which are affiliated with the Joint Council on Economic Education. The primary functions of the center include planning, developing, and conducting economic education programs in five areas: improving instruction in economics for current and future teachers; providing consultation and assistance in the presentation of economic education programs by schools, educational agencies, and community organizations; conducting research in economic education; developing and distributing effective instructional materials for use in economic education programs; and developing and presenting effective economic education programs for adults.

The Georgetown University Bilingual Education Service Center (GU-BESC) is one of 16 multi-functional resource center funded nationally by the U.S. Department of Education to respond to the needs of Bilingual Education/E^{CL} (Title VII) projects. It provides training and technical assistance to individuals and institutions involved in the education of limited English proficient (LEP) students. The GU-BESC provides services related to the education of all minority language groups within the region encompassed by Delaware, the District of Columbia, Maryland, New Jersey, Kentucky, Ohio, Pennsylvania, Virginia and West Virginia (Service Area 3). The GU-BESC also provides training/technical assistance in project management, documentation, and capacity building in the areas of classroom curriculum and instructional improvement. Services are provided through workshops, institutes, conferences, training exchanges, individual or group consultation, bibliographic searches, and referrals.

The Institute for Educational Leadership's (IEL) main purpose is to improve the quality of educational policymaking by linking people and ideas to address difficult situations. IEL serves state, local and national educational leadership and others who have an impact on education policymaking. IEL has several objectives: improving communications among policymakers, educators and consumers of educational services; offering mid-career training opportunities to educational leaders; and helping educators and the public at-large to better understand key educational and social issues. IEL staff and consultants provide direct services for improving policy and practice in education and related human services. Among IEL activities in this area are network access, information dissemination, training, conferences, and administrative support.

The International Reading Association (IRA) seeks to improve the quality of reading instruction, serve as a clearinghouse for the dissemination of reading research, and promote lifetime reading. The association officially began January 1, 1956 when the International Council for the Improvement of Reading Instruction and the National Association for Remedial Teaching merged. Now, more than 1,200 councils and national affiliates in 40 nations are the working foundation of the association. These groups hold regular meetings and conferences throughout the U.S., Canada and the world. Each year the association holds an annual convention. The association also holds a world congress biennially at a site outside North America. The IRA publishes four professional journals, a bimonthly newspaper, and approximately 200 publications on reading and related topics, with about 10 new titles added annually.

The Center for Social Organization of Schools at the Johns Hopkins University was established in 1966 as a national research and development center to study how school organization can be changed to make schools more effective for all students. The center currently includes the National Research and Development Center for Research on Elementary and Middle Schools, the National Center for Research on Effective Schooling for Disadvantaged Students, and the Baltimore Public Education Institute. The mission of the center is to produce useful knowledge about how schools can foster growth in students' learning and development, to develop and evaluate practical methods for improving the effectiveness of schools based on existing and new research findings, and to develop and evaluate specific strategies to help schools implement effective research-based school and classroom practices. The center offers training workshops and technical assistance to schools in the use of cooperative learning, institutional processes and parent involvement practices; publishes a series of technical reports of its research; and publishes the CREMS report, which summarizes its research findings in elementary and middle schools.

The Center for Talented Youth (CTY) provides summer and academic-year programs for mathematically and verbally talented students whose ages range from 7 to 16 years. CTY's 1987 summer programs were offered at four residential sites and six commuter sites throughout the continental United States. CTY focuses on adjusting important aspects of the students' education, particularly the pacing and level of instruction, to meet their assessed needs. The result is an array of educational courses in every area traditionally included in the liberal arts curriculum. CTY also sponsors training institutes for educators that focus on the identification of talented youth, the provision of appropriate, coursework and programs and the adaptation of the CTY model to local schools.

Kean College of New Jersey is a major regional institution of higher learning serving students from the communities of New Jersey and its neighboring states. In addition to its teacher education programs and research activities, the college also seeks to serve the community with the best academic resources and personnel. Activities include programs to recruit minority students to the teaching profession; remedial reading, speech, and hearing clinics for children and adults; a child study institute; and a laboratory school for developmentally handicapped children. The college also provides extensive technical assistance and services to local school districts in such areas as needs assessment, staff development, and program evaluation.

Community Services and Graduate Studies is a newly organized university division. Continuing Education provides both credit courses and non-credit activities tailored to individual and business needs and summer camps and workshops. The Grants and Contracts Office conducts research using state, federal and private grants on a variety of topics, including adult basic education, literacy, educational outreach, rural issues, and other applied research. The Rural Services Institute collects and shares information about factors affecting the quality of life in rural areas, helps solve problems facing the community, and provides students with practical work and study experiences in the community. In addition, an educational outreach project addresses the need to increase rural residents' access to higher education and the changing world of work.

The Maryland Association of Boards of Education is a private, non-profit organization to which all the school boards in the state voluntarily belong. MABE is involved in the following activities:

- providing inservice activities for board members through an annual convention, orientation programs for new board members, and workshops on key topics
- meeting informally with the state board of education
- representing the school board point of view with the Maryland General Assembly and the U.S. Congress through its legislative committee and federal relations network.
- monitoring and reporting about current education issues through its publications
- maintaining a collection of current policy manuals from the local boards of education, and other educational governance materials.

The Maryland Leadership in Educational Administration Development Center (LEAD Center) is undertaking a collaborative effort to improve school-based administrative leadership in the elementary and secondary public and private schools throughout the state. The collaborative effort involves personnel from the Maryland State Department of Education, the University of Maryland, and individuals from the private sector all working in concert to improve the educational achievement of students. The center provides the following services:

- identify and list specific skills required for successful school administration in 10 performance areas
- create, publish and distribute a professional development resource book for school principals, their evaluators and staff developers
- provide a training of trainers program to improve school administrators' skills and knowledge to plan, organize, conduct, and evaluate professional training
- provide financial support for additional staff development efforts
- provide input and work cooperatively with University of Maryland and LEAs to improve professional development programs for school-based administrators.

The Institute for the Advancement of Philosophy for Children (IAPC) is a non-profit division of Montclair State College. It has been a pioneer in using philosophy for children in teaching thinking skills. The IAPC engages in activities in three major areas -- curriculum development, educational research, and teacher education. In terms of the first, IAPC curricula include textbooks and manuals in philosophy for children, teachers, administrators, educators, philosophers, college students and graduate students. Books for children and teachers are developed by the institute itself, which also edits the periodical, Thinking. Educational research activities of IAPC include sponsorship of a series of educational experiments to determine the academic impact of its programs. Teacher education activities reflect the IAPC's own approach to teacher education, utilizing faculty in philosophy or philosophy of education who themselves have been trained in the IAPC program. These specialists are available to serve as workshop directors and consultants in school districts requesting staff development.

The National Alliance of Black School Educators (NABSE) works to remove those forces and conditions which obstruct the achievement, development, and educational opportunities of black youth and adults, and to assist black children in the United States in overcoming those problems directly related to their minority group status. The NABSE provides a forum through which black educators and others directly involved in the educational process can meet, share ideas, and focus on the unique problems which they and their students face. NABSE analyzes and applies shared knowledge to the eradication of problems which stand as obstructions to quality education for black children.

Since 1938, NASDSE has served as the focal point for the professionals who have statewide responsibilities for the education of exceptional children. The association's objectives are: to consider and act on current problems and issues related to special education; to encourage active and effective leadership in developing and improving educational services and facilities; to stimulate helpful relations between those developing statewide and federal special education programs and those responsible for general education at the local, state and national levels; to assist local, state and national communities in promoting and enhancing special education; and to coordinate special education interests through membership in and liaison with local, state and national organizations interested in special education. NASDSE has a history of assisting state and local agencies in program policy and planning. NASDSE also has extensive information-sharing capability including computer-based communication networks, periodical newsletters, handbooks, manuals, conference reports, and other publications on key issues in special education.

The National Center on Child Abuse and Neglect (NCCAN) was established by the Child Abuse Prevention and Treatment Act (P.L. 93-247, as amended) in 1974 for the purpose of helping professionals improve services to children and families in turmoil and to draw public attention to the problem of child maltreatment. NCCAN is responsible for conducting research; collecting, analyzing, and disseminating information; providing assistance to states and communities in developing programs and activities related to the prevention, identification, and treatment of child abuse and neglect; and coordinating federal efforts to combat child maltreatment through its national advisory board. The board, composed of representatives from federal agencies and the general public, provides a framework for sharing information and coordinating the resources of both the public and private sectors.

The Alcohol, Drug Abuse and Mental Health Administration (ADAMHA) established the National Clearinghouse for Alcohol and Drug Information (NCADI) to provide up-to-date information as part of an expanded national effort to prevent alcohol and other drug problems, especially among high risk youth. NCADI provides information and services to anyone with questions or concerns about all types of drugs. Special target groups for NCADI are community leaders, those working with youth, parents, health and human service providers, and persons with alcohol or other drug-related problems. Printed materials, reference and referral services, tours, media, and state clearinghouse network support are available through the clearinghouse, including prevention publications developed by the U.S. Department of Education.

Founded in 1973 as the successor organization to the National Committee for the Support of Public Schools, the National Committee for Citizens in Education (NCCE) is devoted to improving the quality of public schools through increased public involvement. NCCE provides information that parents and citizens need to become involved in school decision-making. NCCE provides the following services:

- a computerized clearinghouse of school-related information accessible to anyone who calls the toll-free hot line, 1-800-NETWORK (638-9675)
- inexpensive, jargon-free handbooks and films for local groups and schools
- training for parents, teachers, and school administrators to help them create school level councils
- a monthly newspaper, NETWORK, featuring important school issues.

The National Institute for Work and Learning/Academy for Educational Development (NIWL/AED) seeks to improve the relationships between institutions of work and learning, to facilitate linkages between education and work for youth and adults, and to bring the supply and demand for critical skills into better balance. In order to achieve these ends, the institute is involved in research, pilot programs, case studies, policy studies, information networking, and technical assistance. While the means vary, a common thread runs through all NIWL/AED undertakings -- the pursuit of collaborative efforts among employers, educators, unions, service organizations, and government to resolve work and learning problems. The development of collaborative processes at local, state, and national levels has been a consistent focus of the institute since its creation in 1971.

The New Jersey Association for Supervision and Curriculum Development is an organization of school supervisors and administrators, teachers and college professors. The common interest of NJASCD members is the improvement of education through effective supervision of instruction and stimulation of curriculum development. NJASCD is an affiliate of the National Association for Supervision and Curriculum Development (ASCD). NJASCD's mission is to provide varied resources and services for its membership; to increase the visibility of the organization at the county, state, and national levels; and to address the critical issues facing New Jersey education at the regional and state levels. Services provided include participating on national committees and institutes, hosting conferences and institutes, conducting workshops and seminars, testifying at state hearings on issues affecting curriculum and supervision, and attending conferences and workshops. Publications include a regular newsletter, periodic monographs, journals, and position papers.

The New Jersey Leadership in Educational Administration Development (LEAD) Center is a consortium of the following organizations: New Jersey Principals and Supervisor's Association, New Jersey School Boards Association, New Jersey Assessment and Development Center, Partnership for New Jersey, and Research for Better Schools. Its primary objective is to improve the preparation, selection, and inservice opportunities for school administrators by forming a partnership to integrate the resources of higher education, business, and professional associations. During its first year of operation, the LEAD Center has assisted in expanding the services of the assessment centers, facilitated corporate management training for school district management teams, and helped in reviewing and restructuring the administrator preparation program at Rutgers University.

The Northeast Curriculum Coordination Center for Vocational and Technical Education improves the cost-effectiveness of vocational education in the north-east states and outlying areas (including New Jersey) through coordination and improved access to information concerning available materials and curriculum development activities. Through its services, the center helps its members reduce duplication of curriculum development efforts. The center participates in the national network; serves as a resource center and facilitator to consortium states in the coordination, development, adaptation, dissemination, and use of curriculum materials and services; participates in the implementation of a codification system of library holdings; and prepares an annual impact report of its activities. (For the center serving educators in Delaware, Maryland, Pennsylvania, and the District of Columbia, see East Central Curriculum Coordination Center.)

The Pennsylvania Association of School Administrators is an advocate for quality public education and the leadership necessary for the achievement of educational excellence. Since 1958, PASA has served chief school administrators and other school administrators by shaping the laws, policies, regulations, and guidelines which impact on education in the commonwealth; maintaining cooperative relationships with all organizations and agencies affecting education; providing services to administrators which enable them to achieve their full potential for quality performance; and generally advancing the interests of the profession and the membership. Regional and state meetings of PASA provide members with opportunities to share information, professional insights, and peer support.

The Pennsylvania Leadership in Educational Administration and Development (LEAD) Center is an advanced study center for educational leaders and leader aspirants. Based at the Temple University Center for Research in Human Development and Education, the institute is part of a national network of centers each with a statewide orientation. It is funded by the Office of Educational Research and Improvement (OERI) within the U.S. Department of Education. The institute's primary goal is to forge a dynamic link between the study of education and improvement of schooling practice. The institute's programs are designed to increase the capacity of educational leaders in applying current scientific knowledge to the improvement of instructional practice.

Research and Information Services for Education (RISE) is a nationally recognized educational information and dissemination center. The objectives of RISE are to provide timely and relevant information in response to requests from professional educators regarding the efficient and effective operations of schools and to disseminate a variety of nationally validated programs in new settings in Pennsylvania. In order to provide timely and relevant information, RISE staff negotiate and clarify information requests with clients and then provide the client with a bibliography, selective response, custom product or computerized resource list. In disseminating nationally validated programs, RISE conducts awareness, training, and follow-up activities with local educational service providers. Services are provided through informal and formal networks, as well as directly to local schools. Publications include an occasional news bulletin, catalogs of literature searches and exemplary programs, and occasional papers focused on research.

Research for Better Schools, Inc. (RBS) is a private, non-profit Philadelphia firm, established in 1966 as an educational research and development laboratory. RBS has an extensive background and expertise in the development of curriculum materials and procedures; for example, RBS pioneered in the development, evaluation, and dissemination of the Individually Prescribed Instruction, Experience-Based Career Education, and Administering for Change programs. In recent years, RBS has emphasized the provision of research, planning, and training assistance to educational agencies engaged in program improvement. Many of the services are provided to constituents by RBS in its capacity as the Mid-Atlantic Regional Educational Laboratory, funded by the U.S. Department of Education. Other service-oriented components of RBS include Evaluation Services and Professional Development Services. RBS also has become a publisher of research-based materials for practitioners particularly on the following topics: thinking skills, assessment of effectiveness, at-risk students, and professional development, and classroom materials.

The Center for Policy Research in Education (CPRE) unites the Eagleton Institute of Politics at Rutgers, The State University of New Jersey; Michigan State University; Stanford University; and the University of Wisconsin-Madison in a unique venture to improve the quality of schooling. The center's activities are funded by the U.S. Department of Education's Office of Educational Research and Improvement. CPRE conducts research on the implementation and effects of state and local education policies. By communicating its findings to policymakers, the center contributes to the framing of policies that relate to improved education. CPRE's research activities are designed to address questions related to curriculum and student standards, teacher policies, educational indicators and monitoring, new roles and responsibilities, and evolution of the reform movement. In addition to conducting research in these areas, CPRE publishes research reports and briefs on a variety of education issues. The center also sponsors regional workshops where state and local policymakers meet together to discuss issues of common concern.

As a participant in the Eastern Shore Teaching Effectiveness Network (Eastern Shore TEN Project), the School of Education at Salisbury State University works closely with school and district administrators and state officials in a collaborative effort to improve teacher education. College faculty and field-based administrators and supervisors develop preservice and inservice teacher education programs based on the network's model of mastery teaching. The principles and practices incorporated in that model have been used by classroom teachers, principals, teacher educators, and student teachers to improve their professional competence. Technical assistance in adapting these programs and the network's model is available from the department of education. Expertise in a wide variety of subjects, topics, and levels is available.

The Office of Elementary and Secondary Education (OESE) is the Smithsonian Institution's central education office. It serves teachers directly through programs and publications as well as through the education offices located in each of the Smithsonian Museums. The Smithsonian's other education offices provide museum lessons or tours for classes on field trips; each of these offices also may develop materials about its own museum's collection or offer classes on using that collection. OESE specializes in programs that use more than one Smithsonian museum.

The Temple University Center for Research in Human Development and Education is an interdisciplinary center for the study of emerging problems and challenges facing children, youth, and families. Its overall goal is to investigate the basic forces that affect human development and schooling. An important focus of the center's work is to identify and shape effective responses to these forces through far-reaching changes in institutional policies and practices. The center draws together the many resources of the university and a wide range of national, state, and regional programs. The result is interdisciplinary and interdepartmental collaborations that involve investigations of social, economic, educational, and developmental factors and state-of-the-art demonstrations of models for training and for the delivery of relevant services.

The National Center for the Study of Corporal Punishment and Alternatives in the Schools (NCSCPAS) was founded in 1976 within the Department of School Psychology at Temple University. The center maintains a large collection of materials relevant to corporal punishment and discipline. Many scholarly studies have been written by center staff. The center operates a child abuse prevention project called the Discipline Helpline. This is a free telephone consultation service for parents and teachers who have discipline problems and are seeking effective methods to cope with frustrating situations. The center also helps organizations and institutions to develop better methods of discipline. Services include climate assessment, individually tailored workshops, and personal consultation with staff.

The Center for Economic Education at the University of Delaware is the principal organization for coordinating economic education programs in Delaware. The objectives of the center are to: (1) provide inservice and preservice to teachers, (2) conduct research in economic education, (3) provide support services for teachers, and (4) offer a Master of Instruction in Economic Education program. The Center works directly with schools and teachers to develop training programs which provide teachers with a background in fundamental economic concepts. It develops and offers materials and teaching strategies for introducing and integrating economic principles into the classroom curriculum. The center also carries out research to assess the impact of its teacher training programs, economic workshops, and courses on student achievement. The center provides services through field coordinators who help with implementation problems, offer suggestions for classroom instruction, and provide instructional materials. A resource center is maintained that makes audio-visual, textual, and background materials available on loan to teachers. In addition, the center distributes a newsletter throughout the state to keep teachers abreast of the latest developments in economic education at the state and national level.

Since 1980, the Center for Educational Leadership and Evaluation (CELE) has been an interdisciplinary organization located within the College of Education at the University of Delaware. CELE provides evaluation-related services to educational decisionmakers in need of information collection of a technical or specialized nature. The center provides assistance which will supplement the time and capabilities of the contracting agency or individual. CELE links project needs with expertise from the university, the community, and, where necessary, the nation. CELE also administers the Delaware Leadership in Educational Administration Development (LEAD) Center technical assistance center in conjunction with the Delaware Department of Public Instruction.

The Center for Educational Research and Development is a joint venture between the Baltimore County and College Park campuses of the University of Maryland (see p. 170). This center utilizes the resources and talent of the University of Maryland to study complex issues in education. The center encourages the participation of faculty from various disciplines in studying problems best handled through a multidisciplinary approach. The goals of the center are: to develop a coordinated multidisciplinary research capability aimed at improving educational programs in the state and region; to develop models, materials, and guidelines to improve the structures, practices, and curricula in educational institutions; to disseminate new knowledge about the purposes, functions, and operations of educational programs; and to help college personnel and government policy makers gain new perspectives on the social and political trends and forces impinging on higher education.

The Center for Educational Research and Development is a joint venture between the College Park and Baltimore County campuses of the University of Maryland (see p. 168). At College Park, the center's mission is to increase the involvement of campus faculty in knowledge production and utilization as it relates to the concerns of state and local education agencies. As a research facility, it is devoted to promoting the study and analysis of complex issues in education. The center links the resources of an academic community with the needs of educational policymakers and practitioners. Working with educational organizations throughout the state, the center conducts research activities and provides technical assistance for a variety of assessment and evaluation projects. Information about center activities are disseminated in the periodic publication, Interact.

The Center for School Study Councils of the University of Pennsylvania Graduate School of Education is actively working to improve the quality of education in member districts. Founded in 1943, the original council has been substantially augmented to serve as an important catalyst for school superintendents and others to discuss common concerns, learn about developments in education and administration, and test research against practice and practice against research. The center consists of three autonomous school study councils and a principals leadership council. The councils that make up the center are network systems that sponsor a range of activities and services for the professional development of member superintendents seeking to foster excellence in education, including monthly conferences, seminars, workshops, and research projects.

The Institute for Practice and Research in Education (IPRE), School of Education, University of Pittsburgh, was launched in 1986. Its mission has been to (1) provide a mechanism through which the university and the school can become more involved and helpful to school districts and education professionals as they work to meet today's educational challenges and (2) to provide leadership and fiscal management to outreach, research, development, and service activities involving faculty in the school. IPRE accomplishes its mission through four sets of activities: staff development initiatives, research and development initiatives, service and educational programs for children and adults, and dissemination. Publications include a directory of faculty in the school of education, a newsletter published quarterly, a bulletin of annual summer study offerings and an annual report of faculty publications.

The Tri-State Area School Study Council is a consortium of school districts, intermediate units, diocesan regions, private schools, and the University of Pittsburgh. This partnership was formed in 1948 and has continued as a link between the professional school and the professionals it prepares. Considerable interaction among the members has been prompted through programs and a variety of services. In order to coordinate and focus the various activities of the study council, the executive committee endorsed the following theme: to improve schooling for all students through problem solving, technical service, and staff development. The theme is pursued through council goals which emphasize the ideal of equality -- the drive to achieve uniform excellence in education regardless of the social differences present in the member schools.

The Office of Evaluation Research specializes in proposal preparation for local school districts and service agencies wishing professional assistance. Typically the office also provides curriculum and evaluation services as follow-ups to funded projects. Alternative educational models are the most common area of proposal consultation (e.g., bilingual-bicultural, adult literacy, child care and early childhood education, gifted education, etc.). The staff are professionally trained in formal program evaluation.

The Regional Computer Resource Center (RCRC) was created in 1984 to improve microcomputer education in the Pennsylvania schools. There are 14 regional computer resource centers throughout Pennsylvania. The objectives are to train teachers in the use of microcomputers, to assist in designing computer-oriented curriculum, to evaluate proposals for upgrading computer instruction in the schools, to recommend computer hardware for schools, and to assist with software evaluation. Computer courses are offered year round through the RCRC.

OTHER: 28, 30, 31, 32, 33, 34, 35, 37, 41, 44, 48, 49, 50, 51, 55, 56, 57, 59, 61, 62, 64, 70, 71, 72, 74, 75, 77, 78, 79, 81, 82, 83, 84, 87, 90, 94, 96, 97, 99, 100, 101, 102, 104, 105, 106, 108, 109, 111

APPENDIX:
Survey Instrument

SURVEY OF REGIONAL EDUCATIONAL RESOURCE AGENCIES - 1988

DIRECTIONS: Please complete both sides of this survey.

I. Agency Information:

Organization Name: _____

Director: _____

Address: _____

Street

City

State

Zipcode

Contact Person: _____

Name & Title

Phone: (____) _____ Year Founded: _____

If this survey is not applicable to your agency, please explain: _____

II. Agency Type - Choose One:

____ Non-profit R&D agency

____ For-profit R&D agency

____ Consultant

____ Post-secondary Education
Institution/R&D center

____ State Professional Association

____ National Professional Association

____ Other (please specify): _____

III. General Types of Services Provided - Choose a Maximum of Five:

____ Development (i.e., program,
curriculum)

____ Management

____ Needs Assessment

____ Planning

____ Program Assessment/Evaluation

____ Program Implementation

____ Presentations/Conferences/
Workshops

____ Publications/Dissemination

____ Research

____ Staff Development

____ Technical Assistance

____ Other (please specify): _____

IV. Size of Professional Staff Involved in Delivering Services to Clients:

____ Number of Full-time

____ Number of Part-time

(OVER)

V. Cost of Services:

- | | |
|--|---|
| <input type="checkbox"/> Free to All Clients | <input type="checkbox"/> Set Fees |
| <input type="checkbox"/> Free to Eligible Clients | <input type="checkbox"/> Other (please specify) _____ |
| <input type="checkbox"/> Fees Based on Cost Recovery | _____ |

VI. Agency Clients - Choose a Maximum of Three:

- | | |
|--|---|
| <input type="checkbox"/> Local Public Education Agencies
(schools, school districts and
personnel) | <input type="checkbox"/> Post-secondary Education
Institutions |
| <input type="checkbox"/> Professional Associations | <input type="checkbox"/> State Education Agencies |
| <input type="checkbox"/> Intermediate Service Agencies | <input type="checkbox"/> Business/Industry |
| <input type="checkbox"/> Private/Parochial Schools | <input type="checkbox"/> Other (please specify): _____ |

VII. Specific Areas of Expertise - Choose a Maximum of Five:

- | | |
|---|--|
| <input type="checkbox"/> Adult Education | <input type="checkbox"/> School - Business Relations |
| <input type="checkbox"/> At - Risk Students | <input type="checkbox"/> School Climate/Discipline |
| <input type="checkbox"/> Basic Skills Performance | <input type="checkbox"/> School - Community Relations |
| <input type="checkbox"/> Career/Vocational Education | <input type="checkbox"/> School Effectiveness/
Improvement |
| <input type="checkbox"/> Early Childhood | <input type="checkbox"/> School Finance |
| <input type="checkbox"/> Educational Technology | <input type="checkbox"/> Science |
| <input type="checkbox"/> Evaluation/Assessment | <input type="checkbox"/> Social Studies |
| <input type="checkbox"/> Higher Order Thinking Skills | <input type="checkbox"/> Staff Development |
| <input type="checkbox"/> Instructional Effectiveness | <input type="checkbox"/> Student Testing/Academic
Performance |
| <input type="checkbox"/> Mathematics | <input type="checkbox"/> Teacher Supervision/Evaluation |
| <input type="checkbox"/> Post-secondary Education | <input type="checkbox"/> Other (please specify): _____ |
| <input type="checkbox"/> Reading/Language Arts | _____ |
| <input type="checkbox"/> School Administration/
Management | |

VIII. Agency Profile - Attach a 100-200 Word Profile Including:

- a) Brief background or history of organization
- b) Objectives or organization
- c) Description of services/technical assistance provided
- d) Publications, products
